B.S. Computer Science	2012
University at Buffalo	

Work Experience

Click Therapeutics
Senior React Native Engineer
March 2023 - Present
Miami, FL

- Built a greenfield digital prescription therapeutic app in React Native to treat people with schizophrenia
- Collaborated with science & research teams to quickly iterate on app content with a tight deadline for clinical study kickoff
- Improved developer workflows by drafting RFCs to gather and implement feedback from other engineering teams
- Integrated Contentful, Datadog RUM, and other libraries to speed up our delivery timelines by way of logging, analysis of user issues, and enabling non-technical teams to update app content

Treasury Prime
Frontend Team Lead / Senior Engineer
February 2022 - January 2023
Miami, FL

- Led frontend team - prioritized & scoped features for upcoming sprint cycles, organized backlog grooming, standups, & sprint plannings. Continuously delivered with Terraform and GitHub actions
- Mentored junior engineers on modern practices & patterns, including Jest & Storybook testing
- Led the initiative to build a reusable React component library, leveraging Chromatic to test for regressions
- Rebuilt docs site from the ground up to leverage Markdoc, reducing product & API team's documentation turnaround time
- Reduced client-side errors by leveraging Datadog & Sentry session replay to capture user behavior

BitFrame
Sole-proprietor
August 2017 - Present
Miami, FL

- Architected frontend & backend platforms using Node, GraphQL, Prisma, Typescript, Azure, AWS, & React
- Used GitHub CI/CD pipelines to ensure consistent & repeatable deployments
- Saved ~70% cost by leveraging Terraform to use services from both Azure & AWS instead of having vendor lock-in

Endava
Engineering Manager
December 2019 - January 2022
Miami, FL

- Migrated on-prem applications to AWS to improve uptime & performance
- Mentored interns on GraphQL, NodeJS, AWS, & Typescript
- Performed as both team lead & developer role, performed code reviews, deployments, & feature dev
- Provided career coaching & personal growth mentorship to six direct reports
- Built enhancements & maintained custom AWS-hosted editorial platform for multinational media client

Valtech Solutions
Senior Engineer
January 2018 - December 2019
Miami, FL

- Led development team based out of India for enhancements & fixes to 40+ .NET & Java applications
- Hosted daily standup meetings to adhere to agile scrum software methodology
- Managed production deployments on CI/CD pipelines using Azure DevOps

Majesco
Mobile Architect
April 2015 - August 2017
Miami, FL

- Designed & developed cross platform mobile application using Xamarin Native
